Parameters

Name	Unit
Row spacing	70 cm
Width	3250 mm
Weight	710 kg
Minimum HP	50-55 hp

Description

The Inter-Row Rotary Cultivator is an efficient agricultural tool designed for soil preparation and cultivation. The cultivator with a working width of 325 cm is ideal for quickly and evenly processing larger areas. The device, equipped with rotating blades, efficiently atomizes and aerates the soil, thereby promoting plant root development and water and nutrient uptake. Thanks to its robust construction and wide working width, it saves time and energy while ensuring a high level of performance during agricultural work.

Optionals:

- Fertilizer Unit Wide Unit (5 Units)
- Furrow Plough Unit
