Parameters

Name	Value
Working width	5000 mm
Width	5200 mm
Number of hoes	40 pcs
Weight	3300 kg
Number of Rippers	3 pcs
Road width	245 cm
Minimum HP	280 hp

Description

Power Harrow is a tillage machine with vertical blades that turns right and left continuously.

It prepares seedbed; eliminates weed and plant residue; mixes fertilizer; creates water channels in deeper layers of the soil. It also minimizes stratification.

Power harrow does not turnover the soil, keeps the moisture inside.
Since the blades operates right and left, it does not hold any soil or mud.
Vertical operation increases the water intake of the soil.
It allows the plant roots to develop faster by preventing stratification deep in the soil.
Specially adjusted blade alignment increases efficiency while reducing vibration.
EQUIPMENTS STANDARD
Universal CAT III or CAT IV 3-point link.
1 3/8” Z:21 Spline PTO Protective shaft
1000rpm gearbox provides rotor speed
of 279 rpm.
300 mm long, 15 mm thick, quick adjustment
high quality blades.
Hydraulically adjustable packer roller with mud scraper
Rotor protection system (developed by Toscano
;prevents entanglement of hoses, cords,
sons, etc.)
Anti-jamming system (prevents blocking of the stone
between the rotors).
Hydraulic floating kit hook
Adjustable leveling profile.
Links before oscillation.
Movable and adjustable side covers.
Removable CE safety protectors.
Specially tuned blade alignment increases
