Parameters

Name	Value
Weight	3196 kg
Working width	5700 mm
Minimum HP	300 hp
Width	6100 mm
Number of hoes	132 pcs
Working depth	270 mm
Number of Rippers	3 pcs
Road width	240 cm

Description

Rotary Tiller or Rotavator is a tillage machine that mixes the soil from bottom to the surface with the help of horizontally rotating hoes. It is used for preparing seed bed; ventilating the soil; shredding and mixing the plant wastes and weeds in the soil. The roller ensures flatter soil surface while working.

Tillage machine that fully crumbles the soil; it maximizes seeds touch to the soil.

Since it turnovers the soil; it causes mixing the plant wastes into soil homogeneously.

Special blade angles enable tilling with faster speed even on the hard clods.

Rippers in front of the machine ensures easier tillage even in harder soils.

STANDARD EQUIPMENT

Universal 3-point CAT III or CAT IV linkage

1 3/8" Z21 Spline PTO Protective Shaft

1000 rpm gearbox speed provides 258 rotor speed

10 mm thick high quality blades

Cage roller

Hydraulic roller adjustment kit

Transmission set with robust gears

3 front rigid shanks

Removable CE safety guards

120-132 Blades; 6 blades per flange; 3 blades on side flanges.
