Parameters

Name	Value
Weight	1580 kg
Working width	3350 mm
Minimum HP	160 hp
Width	3550 mm
Number of hoes	78 pcs
Working depth	270 mm
Number of Rippers	6 pcs

Description

Rotary Tiller or Rotavator is a tillage machine that mixes the soil from bottom to the surface with the help of horizontally rotating hoes. It is used for preparing seed bed; ventilating the soil; shredding and mixing the plant wastes and weeds in the soil. The roller ensures flatter soil surface while working.

Tillage machine that fully crumbles the soil; it maximizes seeds touch to the soil.

Since it turnovers the soil; it causes mixing the plant wastes into soil homogeneously.

Special blade angles enable tilling with faster speed even on the hard clods.

Rippers in front of the machine ensures easier tillage even in harder soils.

STANDARD EQUIPMENT

Universal 3-point CAT II Linkage

1 3/8" Z6 Spline PTO Protective Shaft

540-750-1000 rpm Gearbox provides min150-max325 Rotor Speed
