Distance between rows	450-500, 550-600, 650-700, 750 mm
Weight	1450 kg
Seed Capacity	34x6 L
Width	4000 mm

Description

The pneumatic seeder is a model with a telescopic design, working width of 400 cm, and sliding coulters. This machine is ideal for sowing larger areas, as the telescopic design allows quick and easy adjustment of the working width. The pneumatic seeding system ensures precise seed distribution, while the sliding coulters help to deliver the seed to the right soil, thus improving germination conditions and the uniform development of plants. Thanks to the robust construction and efficient operation of the machine, it enables significant time and labor savings during agricultural work.

Optionals:

- “V” Type Wheel (Per Unit)
- Front Cleaner Disc (Per Unit)
- Front Chisel (Per Unit)
- Complete Seed Press Wheel (Per Unit)
- Seed Covering Legs (Per Unit)
- Seed Flow Control Device (6 Unit)
- Micro Granule Unit (6 Unit)
- Metal Fertilizer (1000lt)
