Parameters

Name	Unit
Number of coulter	6 pcs
Minimum HP	80-90 hp
Width	3850 mm
Road width	300 cm
Weight	1200 kg
PTO speed	540 Rpm
Seed Capacity	34x6 L
Distance between rows	700 mm

Description

The pneumatic seeder is a semi-telescopic 385 cm wide seeder with a sliding coulter system. This type of machine works with pneumatic dosing technology, which allows precise and even distribution of the seed. Thanks to the semi-telescopic design, the machine easily adapts to different working widths and working conditions. The sliding coulter system helps to get the seed into the right soil and accurate sowing, while reducing the pressure on the soil and the compaction of the seed.

Optionals:

- "V" Type Wheel (Per Unit)
- Front Cleaner Disc (Per Unit)
- Front Chisel (Per Unit)
- Complete Seed Press Wheel (Per Unit)
- Seed Covering Legs (Per Unit)
- Seed Flow Control Device (6 Unit)
