Working width	6400 mm
Minimum HP	200 hp
Width	6800 mm
RPM	1000 rpm
Number of Y knife	128 pcs
Road width	240 cm

Description

Flail shredder; also known as Flail Mower or Chopper; is used to shred plant wastes after harvest. All the plant wastes and residues got broken in very little pieces. With this process, residues can dissolve in the soil easily. The process enhances soil microorganisms, so; soil quality. It can be also used as weed mower if needed.

Plant wastes will be mixed with soil, therefore soil recovers its organic material.

It also shreds the wet plant wastes and stems.

It can be used for living plant stem and branch mowing too.

Wider working width saves time and fuel in large fields.
