Description

The primary tillage equipment subsoiler; rips the deep soil layers. It tills the soil without turning over. It can be used in hard and cloddy soils. It breaks soil layers and cause healthy root growth. The pointed roller behind the equipment creates smoother surface. It does not overturn the soil; the soil keeps its moisture. Breaks the deep soil layers; supports vertical root growth for the plants. Ventilates the soil and creates water reservoir below the surface. Roller options are available for operating on different soil structures.
