Parameters

Name	Unit
Plow width	340-420-500 mm
Number of plow	3+1/4 pcs
Working depth	35 mm
Working width	1360 / 1680 / 2000 mm
Tractor Motor Power	74-88 KW
Tractor Power	100-120 HP

Description

The Bomet U052/1 is a reversible plough. It has a 3+1 plough test and is recommended for tractors with 100-120 hp.

Main specifications:

Number of cages: 3+1

Working width: adjustable between 34 cm, 42 cm or 50 cm

Total working width: 1.36 m / 1.68 m / 2.00 m

Working depth: max. 35 cm

Height of frame: 82 cm

Plough bodies: 100 cm

Machine weight: 1595 kg

Recommended tractor power: 74-88 kW (100-120 HP)

The 100 cm spacing between plough bodies and the 82 cm spreader height allow efficient working even in areas with large stalk residues. The main frame profile measures 140 x 140 mm, ensuring stability and durability of the structure. The working width can be easily adjusted by means of adjusting screws located on each plough body.
