Working width	2700 mm
Number of discs (disc harrow)	22 pcs
Weight	975 kg
Minimum HP	85 hp

Description

Compact disc harrows Perseus are universal machines that works well both in cultivation after plowing and in cultivation without plowing, also on medium, stoned soils or soils overgrown with aftercrop intended for mulch. In the series includes machines with a working width from 1,3 m to 2,7 m. The main structural element of the disc harrow is the support frame. There are also two parallel beams equipped with toothed discs with a diameter of 510 mm. They are mounted to the frame with a rake angle of 15°. The disc section is equipped with a maintenance-free hub as a standard. In addition, each disc section is protected individually against overload by a rubber. The working depth (6 - 16 cm) is determined by positioning the rear roller. The compact disc harrow is equipped with a drawbar for easier connection of the machine to the tractor.
