Description

Cultivators Dorado are designed for soil loosening, partial crumbling of lumps, destruction of weeds and runners, and mixing of mineral fertilizers with soil. Cultivators are also recommended for use on stubble fields to stop water evaporation from the soil. The offer includes cultivators with teeth fix "na cybantach". Teeth are fixed to the frame in three rows, and the spacing between the teeth is 140 mm. The teeth are ended with easy changeable coulter. The basic equipment of the machine are two supporting wheels that set machine working depth.
