Name	Unit
Working width	4000 mm
Number of hoes	29 pcs
Weight	960 kg
Minimum HP	115 hp

Description

Tilling and sowing sets – toothed Hercules are designed for simultaneous cultivation soil and seeds. Machines can be used for pre-sowing tillage after pre-sow or pre-winter plowing. Tilling and sowing sets are equipped with a universal supporting frame on which a 2 or 3-row cultivator and a rear roller are mounted. The cultivator is equipped with straight teeth in the case of a 2-row cultivator or spring teeth in the case of a 3-row cultivator. The teeth are ended with a replaceable coulter. Working depth operation is determined by adjusting rear roller in the range to 12 cm. The machine is also equipped with a hydraulic coupler (two hydraulic cylinders) for a seed drill with II and III suspension category.
