Minimum HP	80 hp
Number of discs (disc harrow)	2x10 pcs
Working depth	150 mm
Disc diameter (disc-harrow)	460 mm

Description

Disc harrow is a tool designed for pre-sowing cultivation of concise soils and those ploughed before winter (except for stony soils), with humidity ensuring proper operation. Disc harrow is also used for tearing and crumbling furrows after ploughing on meadows and other grassland as well as for shallow ploughing of stubble immediately after cutting the plants. Disc harrows can be used for shredding and covering manure after spreading and for small and medium-sized green fertilizers. The machine can also be used for mixing the soil with sown mineral fertilizers and lime.
