Parameters

Name	Value
Weight	500 kg
Hammer PCs	16 pcs
Working width	800 mm
V-Belts	4 pcs
Rotor Diameter	168 mm
Max tree diameter	10 cm
Hydraulic pressure	250 bar
Hydraulic oil	60-80 L
Rotor diameter with teeth	380 mm
Hydraulic motor	Piston .

Description

X-Delta M Grizzly - Professional Forestry Mulcher for Medium-Sized Excavators

The **Aardenburg X-Delta M Grizzly** is an exceptionally robust professional forestry mulcher, specially designed for medium-sized excavators. With its integrated rotor limiter, it ensures reliable, overload-free operation even under intensive use.

Key features and advantages:

- **Rotor limiter:** guarantees stable and continuous performance without overloading the machine, even when paired with medium-sized excavators.
- **Widia hammers:** 2.3 kg tungsten-carbide reinforced hammers work effectively on undergrowth, stumps, and even stones.
- **M-Grizzly reinforced structure:** its robust build provides excellent resistance to heavy-duty tasks and extreme working conditions.
- **Integrated mulch door:** a 2-in-1 solution allowing quick adjustment between mulching and ground preparation.

User benefits:

Capable of clearing tough terrain, whether covered with undergrowth, stumps, or stones, while maintaining reliable and steady operation. The rotor limiter ensures efficiency without putting excessive strain on the drive system. The reinforced structure guarantees long service life and consistent performance under extreme conditions. Thanks to the mulch door, it easily adapts to different working phases – from rough clearing to fine mulching.
