Description

The Log Grapple R49 is the heavyweight champion of forestry grapples and can be **mounted on excavators**, effortlessly tackling the most demanding tasks. With a load capacity of 4800 kg and a 0.49 m² grappling area, it confidently handles even the largest logs. Precise hydraulic control and sliding bearing components ensure smooth operation, while the solid steel structure provides long-term reliability. The R49 delivers the perfect balance of power and efficiency for forestry work.
