Parameters

Name	Unit
Working depth	200 mm
Weight	245 kg
Minimum HP	10 hp
Working width	560 mm
Drivegear	tractor PTO

Description

Vibrating digger (aside discharge) Ursa is designed to harvest of potatoes, sugar beets, carrot and other root crops. Machine is recommended on small plantations on light soils, medium compactness soils without stony, and plant residuals. Simple construction, easy maintenance and service are the important advantages of this machine. Two disc coulters cuts off the plants, dual share cut the ridge in the bottom part carrying it horizontally to the vibratory sifter. Two sifters, moving in opposite directions, removes the soil, puts the vegetables in the narrow rows along the machines. This arrangement ensures smooth working of the machine and makes crop of vegetables easier. It should be noted, that construction of the digger characterized by very low potatoes damage index.
