| Weight | 26 kg |
| Working width | 570 mm |

Description

The Zizani M is a mechanical stump cleaner, available in two types F and T which differ in the shape and material of the cleaning fibres (T is a damil/tube/rod while F is a rubber blade). Because of its name, it can also perform trunk cleaning and weed cutting in vineyards and orchards on the trunks of the plant or between the rows. To use it, a compatible factory adapter for 1-sided or 2-sided use can be purchased from Agrohof. Recommended mainly for small and medium-sized farms.
