Description

In the absence of a PTO, the Boxer Agri ZS 83E electric salt and fertiliser spreader may be the ideal choice. The machine has an angular hopper shape, made of strong-walled plastic, with a capacity of 83 litres. The lower spreading disc is equipped with 4 blades for a better spreading pattern.

It can be easily and quickly mounted on any vehicle (loader, forklift, quad), requires only one 12 V conventional (7 foot) trailer socket and the spray volume can be easily adjusted with the remote control supplied.
